

Custom built homes
beyond the ordinary.

Tempo Group has been building homes of exceptional quality and transforming properties into beautiful living spaces for more than ten years.

Tempo
Group

Create your perfect dream home.

From coastal retreats, terrace homes and luxury apartments, to custom residences for families with kids that refuse to leave home, the Tempo team is proud of the work we do and we're passionate about helping you achieve your perfect dream home.

The Tempo Group was founded by Peninsula local and father-of-three Ben Comelli with a mission to create one-of-a-kind custom built homes for those looking for something beyond the ordinary. Located in the heart of the Mornington Peninsula, we pride ourselves not just on creating exceptional homes – we help you to build the lifestyle you've always wanted.

Innovation Centre

The Tempo Innovation Centre demonstrates the quality of our workmanship and showcases the very latest materials and fittings setting trends in residential developments. It's where we chat about your individual taste and lifestyle requirements.

Your needs come first, so we offer flexibility of design to help you build your dream home in the most cost effective way and in the shortest time. Our building and design consultants provide expert knowledge and advice. We guide you through the entire build process and ensure you're involved every step of the way.

The journey

We build beautiful, sophisticated, livable homes through the seamless integration of design, project management and construction. Our process is very straightforward, flexible when you need it to be and above all, transparent. Our fully integrated service incorporates careful planning, detailed client communication and solid advice, which is reflected in the quality of our work and the finishes of every home.
